

## LS 45/55 and FL WinLab Familiarization

**L020-0340**

**1 Day**

**Tuition**

**£385**

This one-day course covers use of the LS45/55 instrumentation and its Windows-based FL WinLab software package. It will assist users of FL WinLab in setting up methods for automated analysis, and producing customized spectra and reports that can be printed out or transferred to other Windows applications. The course will cover the basic principles of fluorescence, as well as recording data in the popular modes of operation. It will then concentrate in detail on the other applications in the software package of most interest to the attendees. Other topics will include performance validation of the LS50B and customizing output via the Report Builder feature of FL WinLab.

### Prerequisite

Attendees should have some experience in luminescence spectrophotometry and a working knowledge of Microsoft Windows, as well as the methods they need to set up in their own laboratories.

### Lectures and Labs

- Scanning spectra
- Read mode for single point measurement
- Concentration mode
- Wavelength program
- Other specialist modes available

The course duration is one day, starting at 09:30 and ending at 16:30.
